The attachment lists East German factories which are to be released as of 1 January 1953 from the rolling mill products quota plan and are permitted to draw raw material directly from the producer (Direktbezug); it also gives the amounts of various materials which those factories may draw in 1953. The list was proposed by the Material Procurement Department of the Main Administration for Heavy Machine Construction and forwarded to the Marketing Department of the Ministry of Mining and Smelting; it was approved by the State Administration for Material Procurement on 25 October 1952. Quarterly allottments can be calculated by dividing the quota for the year by four.
